# ANNA — is hot!

Anna raises the temperature! Not just because of her hot looks, but mainly because this wonderful little heater is equipped with a modern PTC ceramic heating element. Anna heats discreetly and quietly with two power levels, bringing agreeable warmth. But the clever heater also stands for safety in two respects: no overheating thanks to the PTC heating element (self-regulating ceramic) and automatic shut-off thanks to integrated tilt protection.

## Specifications

Anna: Power: 1'200, 2'000Watt / Dimensions: 146x367x95mm(widthxheightxdepth)/Weight: 2.05kg / Very slim housing / Thermostat / 2 speed levels / Room size up to 25m<sup>2</sup> / Sound level: < 43dB(A)
